A Note for Parents

Read this once, then let them loose with the scissors.

This is a cut and paste book with deliberately large pieces. Every piece is an 84mm square, which is four to a sheet. That is nine times the area of the small pieces you find in most printable packs, and it changes the whole activity.

Big pieces matter more than they sound. A three year old cannot hold a small square still enough to cut round it, gives up, and decides cutting is not for them. A big piece can be gripped in a whole fist, cut with long confident snips, and stuck down without tweezers. The finished page looks like something too, which is most of the reward.

Every activity is a piece sheet or two, then the page they get stuck onto. The page numbers cross-reference each other, so nobody has to hunt.

Print in colour if you can. The pieces are coloured and the pages they stick onto are line art, so the moment a piece goes down it stands out. If you only have a black and white printer the book still works, and your child can colour the pieces in first, which is a quiet extra half hour.

Print the piece sheets on ordinary paper, not card. Thin paper is far easier for a small hand to cut.

"It does not have to be neat."

Worth saying out loud at the start. A crooked sun stuck slightly off the dotted box is a finished activity. Tidiness comes years later and it comes on its own.

Lines, Kit and Safety

One page that makes the whole book make sense.

What the lines mean

Red dashed line

Cut along this. Every cut line in the book is red and dashed.

Grey dashed box

Stick a piece here. The box is always a little bigger than the piece.

Grey tab marked glue

Fold and glue. It only appears on the finger puppets.

What you need

Child-safe scissors

Blunt tipped. Left-handed ones if your child is left-handed, because right-handed scissors hide the cut line.

A glue stick

Far less mess than liquid glue and it holds paper perfectly well.

A colour printer

Or a black and white one plus colour pencils.

Ordinary paper

Not card. Thin paper cuts far more easily.

Please stay in the room. Scissors need an adult nearby, every time, however careful your child is. Cut the trickiest pieces for them if they ask.

Wrap each one round your finger and glue the grey tab at the bottom to the back. Then put on a show.

Name _____ Date _____

How to make them stand up

1. Cut it out

2. Wrap it round

3. Glue the tab

4. Put it on your finger

Now make up a story

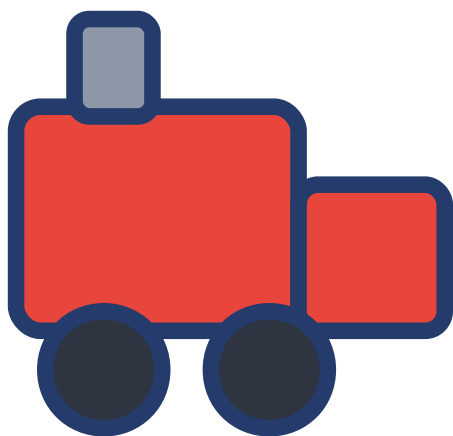

Give each puppet a name and a voice. Who is the friendliest? Who is the noisiest? What happens when they all meet?

This one needs a grown up to help with the glue tab.

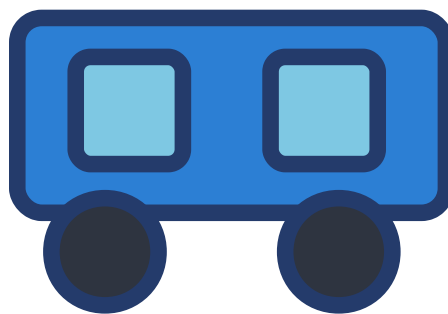

Build a Long Train

sheet 1 of 2 · 4 big pieces

What to Do Next

Six ideas for when the book is finished, none of which need anything new.

1. Keep the leftovers

Spare pieces make a good collage. Give them a blank sheet and let them stick everything down in a pile.

2. Print the face sheets twice

Two sets means two faces, and then they can be a family.

3. Make it a posting game

Cut a slot in a shoebox lid. Post the big shapes through it before sticking them down.

4. Laminate the scene pages

Then use sticky tack instead of glue and the pieces move around again and again.

5. Let them cut junk mail

The best cutting practice in the world is free and arrives through your door every week.

6. Talk while they stick

Ask why the fish goes under the boat and not above it. The talking is where most of the learning happens.

One last thing. Cutting is tiring for a small hand. Two or three activities is a good session. If they lose interest halfway through a page, stop there and come back to it, and say nothing about finishing.

Scissors and Glue Champion

This certificate is proudly given to

for cutting out all 100 big pieces in this book, for sticking every one of
them down, and for not minding when a few went on slightly
crooked.

Date

Grown up signature

Glue on the fingers means it went well.

Every crooked sun and upside down fish in this book is a small hand getting stronger. Print the piece sheets again whenever you want another go.
